

The Indiana Telephone Privacy law has been and continues to be the only reason my phone does not ring with unwanted calls. Prior to the Indiana Telephone Privacy law we had to use a privacy manager on the phone which screened some of our desired calls as well. We no longer have to use any kind of privacy manager and caller id is not really required either. Because of the Indiana Telephone Privacy law it costs a significant amount less to have a phone in our home. Please do not let the law be changed.

Thank you, Richard Carteaux
